TELEPHONE. Pittsville, Md. 301-835-2101 day or night, and 301-835-8082 night only.

BUSINESS HOURS. We are open from 7:30 a.m. to to 4:00 p.m. Monday through Friday, except during the spring digging season when we are open from 7:30 a. m. to 5.00 p. m. Orders already dug may be picked up Saturday morning. Also open on Saturday afternoon by appointment. Not open on Sunday.

ORDER IN ADVANCE. To be sure of getting your plants at the desired time, please place your order well in advance.

ZIP. When ordering, please give us your ZIP code No.

PRICES. Prices quoted here cancel all previous lists and are subject to change without notice. These prices apply only to nurserymen, florists, and dealers. To assist us in limiting wholesale prices to members of the trade, we request that you place your order on business letterhead stationery. Prices here are f. o. b. this nursery.

We will furnish one to four plants of a variety and size at each rate; five to 24 of a variety and size at the ten rate; 25 to 249 of a variety and size at the 100 rate; 250 or more of a variety and size at the 1000 rate. If a variety is listed at 10 rate and not at the each rate there will be an additional charge of 25 cents per plant if less than 5 are ordered

TERMS. To those who have established credit with us, our terms are NET 30 days. A finance charge of 1% per month (12% per annum) is assessed on amounts 30 days or more past due. **THOSE WHO HAVE NOT ESTABLISHED CREDIT, PLEASE REMIT WITH ORDER.**

DEPOSIT. We require a 25% deposit to hold any plants not to be dug immediately upon placement of order. With the exception of strawberry plants, our plants are not in cold storage but are dug expressly to fill an order. Therefore, a 25% deposit is required for such orders and, if the order is cancelled after digging, this deposit will be forfeited to cover costs of digging and replanting.

PACKING AND SHIPPING. When plants are shipped, the customer pays packing and shipping at cost. In ordering, please add 10 percent of the cost of the plants to cover packing and shipping. If the actual cost differs from that 10 percent, we will refund or bill you accordingly.

MAXIMUM SHIPPING SIZE. Due to the costs of packing and shipping, we do not ordinarily ship plants that are more than 6 feet tall. If the customer specifically authorizes it, we will in appropriate cases, prune a large plant back to proper shipping size.

READ BEFORE ORDERING (cont.)

CLAIMS AND GUARANTEE. Claims for shortages, errors, or any cause, must be made within 5 days after receipt of shipment. In no case are we liable for more than the invoice price of the plant. We guarantee to ship good, healthy true-to-name stock but we do not assume any risk or responsibility for transporation, growth, or life of the plants after they leave this nursery. If your plants are damaged or excessively delayed in transit, please file a claim against the carrier immediately.

TELL US HOW TO SHIP. We ship by parcel post, motor freight, railway express, United Parcel Service and bus (Trailways and Greyhound). If you desire shipment by UPS or bus, please give us your telephone number. We can arrange shipment by truck if the size of the order warrants paying for a full load.

PRICE SCHEDULE FOR BALLING AND BURLAPPING. In case of those plants specifically listed B&B, the prices in this catalog include the cost of balling and burlapping. Others are shown at bare root prices. A general guide for the additional charge of balling and burlapping follows:

Height of Plant	Charge
2½ to 3 ft.	$2.00
3 to 4 ft.	2.50
4 to 5 ft.	3.75
5 to 6 ft.	5.00

These charges may vary depending upon the variety of plant involved.

PLANTS NOT LISTED HERE. We have many plants which are not listed in the catalog because they are too large to ship, but which would be of particular value to landscapers. We welcome your inquiry for materials to meet your specific needs.

TIME OF SHIPMENT. We can ship throughout the year except during extreme winter weather. Please tell us when you would like to have your order shipped.

CONDITIONS OF SALE. All orders are accepted on the condition that they shall be void if our crops are damaged by conditions beyond our control.

PLAN TO VISIT OUR NURSERY. We welcome your visit and extend to you the invitation to see our plant material. We are on the Eastern Shore of Maryland, ten miles east of Salisbury.

HARDINESS ZONE MAP

The zone number which we give is the northernmost zone in which we believe the plant to be hardy under average winter conditions. It should be noted that a plant's ability to survive the winter is not determinded solely by the minimum temperature to which the plant is exposed but is also affected by the plant's general health, the soil moisture content, and the exposure to scalding sun and wind. Our assignment of a particular zone number to a plant should not be construed as a guarantee that the plant will survive in that zone. We can make no warranty, expressed or implied, as to the ability of any plant to survive after it has left this nursery.

AZALEAS

BACK ACRE AZALEAS

B. Y. Morrison

These azaleas are the first of the seedlings grown on personally by B. Y. Morrison, with a breeding program that is an extension of the original Glenn Dale work. They are not Glenn Dales, but are more closely related to the Satsuki group from Japan.

The breeding program centered on the production of double flowers that will be hardy for outside work, and in as wide a range of azaleas that have white or nearly white centers and colored margins. The doubles are represented in this offering.

These azaleas are from parents that are cold hardy in Washington, D. C. Plants have been tested safely in that area, in Memphis, Tenn., and in the general Atlanta area. In extremely cold winters there was some loss of flowers buds.

The usual variation in degree of doubling may be expected on newly set plants, and the variations in light centers will vary considerably until the plants are old enough to have many, small, blooming shoots.

GABLE'S HARDIER AZALEAS

Mr. Joseph B. Gable of Pennsylvania spent almost a lifetime working with Azaleas and Rhododendrons. Many years ago he started breeding azaleas with the hopes of producing a hardier type of evergreen azalea in a good color range. He had wonderful success and is now recognized as a leader in the field.

These varieties will average hardier than Hinodegiri and much hardier than the other Kurumes.

GLENN DALE AZALEAS

Since we began growing Glenn Dale Azaleas, in 1941, they have become rather widely known and the demand for them has increased rapidly. Their ability to survive in areas where evergreen azaleas have been previously winter-killed has made them very popular.

Sometimes, when their flowers are described as striped or flaked, there will be scattered branches of solid colored flowers. Those branches should be cut out. This characteristic is inherent to the variety, not a fault of the nurseryman.

KAEMPFERI HYBRID AZALEAS

In the Kaempferi Hybrids—the result of crossing Kaempferi and Malvatica—there has been obtained the hardiest type of evergreen Azalea, with a good range of form and color in the flowers. Several year's tests have demonstrated that these Hybrids are just as hardy as Kaempferi, until now the hardiest of the evergreen sorts.

KURUME AND RELATED HYBRID AZALEAS

The Kurume Azaleas are some of the most showy of all flowers for the garden. They are also well adapted to forcing-thousands of them being sold for Easter, Mother's Day, and Decoration Day. They are comparatively easy to grow and make a wonderful display. Many of the varieties are hardy out-of-doors as far north as Long Island.

HEATHER

For convenience we have listed both the Callunas (Heathers) and the Ericas (Heaths) under one heading. Typically the Ericas bloom in the spring and the Callunas bloom in the fall. However, some varieties, particularly among the Callunas, are erratic. We have seen the Callunas bloom in June and then again in the fall. Calluna vulgaris 'Tib' has bloomed in June, Oct., Nov., and Dec. at this nursery. Colors following variety name indicate the color of bloom.

EDCO IRON

For use in the control of chlorosis in azaleas, gardenias, roses, citrus crops, etc.

Results to date have shown Edco Iron to be very effective in correcting chlorosis in the above crops. Chlorosis may be caused by the excess or deficiency of several major or minor nutrient elements in the plant besides iron, and it may be caused by an excess of water or its lack, but Edco Iron commonly seems to help correct the effect if not the cause of these several conditions.

Full directions for using with each lot.
Prices: 1 lb. $2.90; 10 or more lbs. at $2.70 per lb.
